Education :-

The exhibition will be a great networking platform for the World's Best Universities & College Representatives with Indian Students as well as their Parents & Counselors. The Exhibition provides abundant opportunities to explore study in India and Abroad opportunities.

Science & Technology:-

Science and Technology have always been an integral part of Indian culture. Natural philosophy, as it was termed in those ancient times, was pursued vigorously at institutions of higher learning. The Indian Renaissance, which coincided with our independence struggle, at the dawn of 1900s witnessed great strides made by Indian scientists. This innate ability to perform creatively in science came to be backed with an institutional setup and strong state support after the country's independence in 1947. Since then, the Government of India has spared no effort to establish a modern S&T infrastructure in the country. The Department of Science and Technology plays a pivotal role in promotion of science and technology in the country. This section offers detailed information pertaining to scientific education and scientific research & development. Details of policies, schemes, documents and programmes for scientists, researchers, scholars, students, etc. are also available.

Power & Renewable Energy:-

India is the third largest producer of electricity in the world. During the fiscal year (FY) 2022–23, the total electricity generation in the country was 1,844 TWh, of which 1,618 TWh was generated by utilities.

This 3-day event in India provides pathways for power sector companies to transition their businesses by increasing their understanding of changing trends, strategies and technologies, while connecting buyers and sellers and is the leading force in delivering a platform for the power industry. Catalyst for Development: The power and energy sector drives the growth of industries, agriculture, and domestic needs, highlighting its importance in India's economic development.

Health:-

These exhibitions serve as a platform to disseminate knowledge about preventive measures, clinical features, investigations, and treatment options of diseases, as well as raise awareness about health facilities and various career options in the health sector. expos offer a platform for companies and organizations to display their new products and services to potential customers, network with peers, and gain industry insights. They are usually held in convention centers or exhibition Halls, Exhibiting at conferences is a great way to meet with potential customers & learning more about the industry. Attracting an increase in clientele and sales numbers or getting some face time with industry leaders & experts are just a few ways exhibiting at health conferences can be an ideal opportunity for you.

Banking Insurance :-

The banking sector in India plays a pivotal role in the country's economic development and financial stability. It serves as the backbone of the financial system, performing several critical functions. The commercial banks provide the required financial support and Infrastructure for both internal and external trade, India is expected to be the fourth largest private wealth market globally by 2028. India has a diversified financial sector undergoing rapid expansion, both in terms of strong growth of existing financial service firms and new entities entering the market. The sector comprises commercial banks, insurance companies, non-banking financial companies, co-operative, pension funds, mutual funds and other smaller financial entities.

Electronics & Information Technology:-

The Ministry of Electronics and Information Technology (MeitY) is an Indian government body focused on promoting digital governance, fostering the electronics and IT industries, and enhancing India's role in internet governance. Its core functions include formulating and implementing policies for IT and electronics, promoting e-governance and digital services for citizens, encouraging IT education and R&D, and ensuring a secure cyberspace. MeitY's focus areas include the development, promotion, and regulation of the electronics and IT industry in India, fostering digital governance, enabling innovation in emerging technologies and promoting cybersecurity initiatives within country.

Jal Jeevan Mission:-

Aware the masses about 'Jal Jeevan Mission' scheme and how this mission will help in providing tap connections to every household of the country till 2026. Aware the masses regarding how to manage, develop, conserve and protect water and related resources. Inform the masses how they are working on utilizing the water resources available for increasing irrigational benefits, PMKSY, Atal Bhujal Yojna, Namami Gange etc. To disseminate knowledge regarding importance of surface water/underground water resources and its distribution. This event is being organized to aware the youth, students, general public & citizens about achievements, schemes and policies undertaken by the government and private sectors for the betterment of
